

Patient Name: Steven R.
Patient Age: 50
Occupation: Power Plant Operator
Procedure Date: February 23, 2006
Discussion Date: November 16, 2006
Physician: Charles Dietzek, D.O., FACOS

“Right after the procedure, I felt better!”

Steven claims he had been experiencing a burning sensation in his legs for a year or so before he saw Dr. Dietzek.

Steven explains that Dr. Dietzek recommended the VNUS Closure® procedure to him for his venous insufficiency. Steven says he agreed to do the procedure because it was a minimally invasive procedure. To him, it seemed like the easiest option.

Steven says the entire procedure took about 30 minutes to complete and that he did not experience pain.

He informs that a couple of days after the VNUS Closure procedure, he was back to his normal activities. He says he doesn't experience the burning sensation in his legs anymore and that his life is back to the way it was prior to the leg discomfort.

These testimonials are based on individual experience. Outcomes may vary depending on a person's particular condition and circumstances.
